Bespoke Solutions
Cloud Technology Adoption

ENTERPRISE APP DEVELOPMENT

Adapt superfast, scalable, and robust technological platforms for your **Enterprise**

Research and Analysis

We start with analyzing and researching vital stats of your business.

Enterprise ecosystem, legacy work environment, and more to derive the best possible solution.

Documentation & Prototype

We document the overall system architecture and technology stack.

Our team will then proceed with the development of a minimum viable product (MVP) in order to find future models of work and its capabilities.

Rapid App Development

Our arsenal of enterprise expert app developers follow a rapid application development framework in which we use prebuilt components to build an app instead of starting everything from scratch.

This allows us drastically reduce development time.

APP DEVELOPMENT

Transform your idea into a game changing experience with **Blue Hex**

Android App Development

We have a team of brilliant full stack android developers that has great hands-on experience with Android app development tools and framework.

We build native Android applications on Kotlin and Java language.

iOS App Development

We follow industry standard iOS app practices for the development process that are flexibly operated on the iPhones and the iPads as well.

We are building iOS applications with Objective C and Swift.

Cross-platform App Development

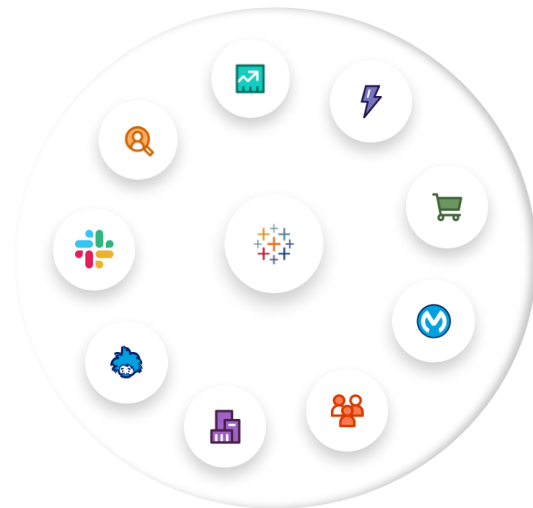

Single application for multiple platforms. By the cross-platform app development, we save time and cost of implementation for the customer.

We are building cross-platform apps with Flutter and React Native.

SALESFORCE CRM SERVICES

Expert Salesforce guidance for an expanding business.

We Design

Salesforce isn't a one-size-fits-all solution, it's a bespoke proposition. Therefore, our process starts with understanding your business and its needs.

We work with you and your team to address issues across the organization and find opportunities for improvement. Then we make a plan.

We Build

We use the Agile project management methodology to deliver quickly, involving you in the entire lifecycle: planning, building, testing, training, deployment, and change management.

We utilize Salesforce's capabilities, ensure your technical set-up is optimized and aligned with your business processes, and ensure you are getting the most from your Salesforce investment.

We Educate

We are fluent in the languages of both business and technology. We will educate you and your team about what we know and how it applies to your business.

We do an amazing job of making your internal processes more efficient with a proactive approach.

BOLT ERP SERVICES

Significantly reduce the cost of implementing ERP system

BLUESPARKS AI

Inventing **What's Next.**

Explore

We explore your business process and help you realize how many opportunities come from implementing AI solutions into your business, along with the analysis of available data and data's monetization potential.

Experiment

Our highly-skilled, regressive, and hard-working team of AI/ML engineers experiments with AI solutions that improve your business outcomes with ready-made intelligence for your applications and workflows.

Engage

Make your Business future ready by enabling Artificial Intelligence based smart conversational chat bot. Effectively use AI in business to automate the manual task.

AI Expertise - Innovating Insurtech

What we have achieved

Problem statement

Difficulty in navigating through hundreds of pages of insurance policy document and identifying the benefits in-between hidden clauses and industry jargon.

Solution

Utilized computer vision, image processing and bespoke ML model along with business understanding of insurance industry to develop a one page summary of what your policy has to offer and discover the good, bad and ugly in your health plan.

AI Expertise – Automating Fintech

What we have achieved

Problem statement

Inaccurate manual reconciliations which is already a time-consuming and resource-intensive activity often leads to missed payments, late fees, and even bankruptcies. Failure in detecting fraudulent transactions is another major pain point.

Solution

Developed a middleware to connect ERP with banking system to import bank statements and perform automatic data matching and real-time reconciliation.

AI Expertise - IntelliParser

What we have achieved

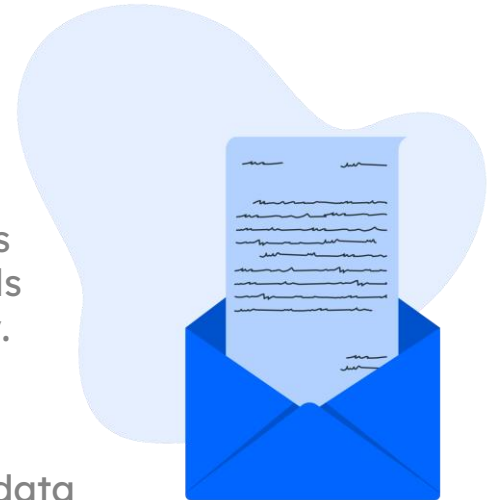

Problem statement

Manually opening emails and extracting contact names, addresses, to shipping notifications etc. This repetitive task of copy pasting key data from emails increased operations TAT and reduced productivity.

Solution

Developed a ML Parsing engine for extracting key data from thousands of emails within fraction of seconds based on custom parsing rules.

PowerBI + Bluesparks AI

Use **data** to drive decisions, gain competitive advantage

Problem statement

Significant manual effort to compile data in excel and compromised data integrity due to manual entry that come with human error. Doesn't show data in real-time and lack of security.

Solution

Created a analytical solution using PowerBi and our custom analytics engine to supports the creation of interactive reports and dashboards that effectively integrate disparate data to provide valuable insights.

END-END IT SUPPORT

Unlock the full potential through
Operations Transformation.

IT Strategy & Planning

Our dedicated team of technical experts work with you to develop an IT strategy to ensure your technology decisions meet your business needs.

Business Continuity & Disaster Recovery

We help you devise a business continuity plan to keep your critical systems and processes safe while providing you with peace of mind.

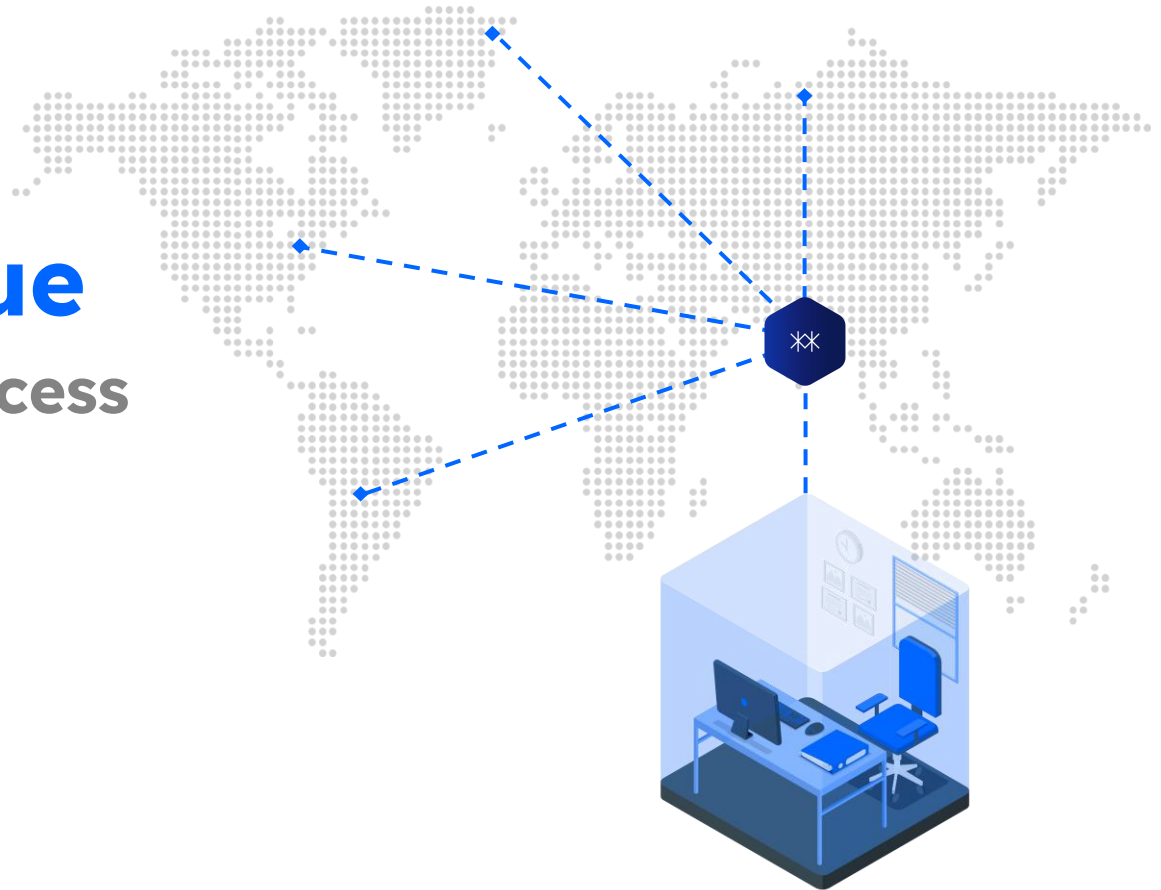

Governance Risk & Compliance

We work with you to assess, plan, implement, and manage IT frameworks for a successful alignment of infrastructure and organizational strategy.

CUSTOMER TESTIMONIALS

SANDESH MISHRA

CEO – BIMA GARAGE

“BlueHex has a transparent workflow, communicating daily and clearly outlining next steps. They take time to understand requirements, aiming to satisfy the end user and not just finish quickly.”

BHAVESH LAKHANI

CTO - INDUSIND BANK

“Both the team and code are responsive. The team worked hard and politely on my little nerdy requests, bug fixing, and customizations. ”

CUSTOMER TESTIMONIALS

JASHVANT RAVAL

CEO – JCR CONSULTING

“We implemented their ERP at our auditing firm. The operations team moved out of using 3 different tools to Bolt. I had complete transparency on all our day to day ops and report generation was a breeze to handle ”

RICARDO ROSALES

CEO – INTERBROKERS MIAMI

“We had a niche requirement for developing a quotation engine and tried two vendors before ending up with Blue Hex. They listened to every single requirement of us and executed them to perfection ”
